

**Student:** Aidan Sharpe

---

**Lab wrap-up:**

Hematocrit is one way to measure which of the following characteristics of the blood?

Oxygen-carrying capacity

**Apply what you have learned:**

Looking at your blood sample results, select all samples that represent a person likely to have been blood doping.

Sample A

---

**Collected Lab Data**

Enter the hematocrit volume percentage.

Blood Sample	Positive (Position 4)	Negative (Position 16)	A (Position 8)	B (Position 20)	C (Position 12)
Hematocrit (%)	60	49	60	50	50
