

**Student:** Aidan Sharpe

---

**Apply what you have learned:**

Based on your observations, what happens to the near point of focus as people age?

Near point of focus moves farther away.

---

**Collected Lab Data**

Accommodation Reflex		
	Patient 1	Patient 2
Sex	Male	Male
Age	42	19
Distance of Blurry Image (cm)	19	6
Near Point of Focus (cm)	20	7
