

Student: Aidan Sharpe

Apply what you have learned:

It is possible for a patient to have both obstructive and restrictive disorders simultaneously. What would you expect in the lab data of a patient with both obstructive and restrictive disorders?

Reduced lung volume with reduced air flow

Collected Lab Data

Patient	Preliminary Diagnosis	Lung Volume	Flow-Volume Loop	Final Diagnosis	Disease
Jerome	Normal	Normal	Normal	Normal	No disease
Bob	Obstructive	Normal	Obstructive	Obstructive	Chronic bronchitis
Chuck	Restrictive	Restrictive	Restrictive	Restrictive	Tuberculosis
Daniel	Obstructive	Restrictive	Obstructive	Obstructive	Asthma
