

Student: Aidan Sharpe

Apply what you have learned:

Why must the angle of astigmatism be determined before the corrective power of the lenses?

If the corrective power is determined first, it will be difficult to determine which lines are blurry.

Collected Lab Data

	Patient 1	Patient 2	Patient 3
Sex	Male	Female	Male
Age	62	35	21
Angle (degrees)	90	120	150
Correction (diopter)	-1	-0.75	-1.5
